

Solutions for Service Providers

Current Challenges Facing Operators & Service Providers

There have been a number of challenges that have arisen within the service provider environment, including:

- Network Performance and Dimensioning
- Visibility & Understanding of Subscriber Behaviour, Network Behaviour and Service Behaviour
- Quality of Service
- Price Compression
- Service Commoditisation
- Reduced Barriers to Entry for New Competitors
- Security
- Revenue Leakage

What Operators & Service Providers Need to Achieve

In order for operators to meet customer service expectations whilst at the same time maintaining a sustainable business, they need to achieve the following:

- Economies of Scale
- Provide Market-Leading Quality of Experience
- Optimise the Costs of Providing the Services
- Ensure Robust Reliability of Services
